

Dear reader,

D<sup>2</sup>EPC has the ambitious goal of laying the foundation for the next generation of dynamic energy certificates for buildings. This means that an energy certificate will be based on the smart-readiness level of the building and the corresponding data collection infrastructure and management systems. It will be fed by operational data and adopt the concept of a "digital twin" to drive building data modelling and calculate a novel set of energy, environmental, financial and comfort/wellness indicators.

To gather information from concerned stakeholders across Europe, define the state of the art for energy performance certification, and identify needs, we launched a survey to identify standardization needs and gaps in the current standardization landscape for energy performance certification.

We have launched a digital survey and would appreciate a large number of participants. This way, your opinion can be incorporated into a new set of dynamic EPC standards.

*The questionnaire contains 12 questions, filling out the survey should take you around 15 minutes. All you have to do is click the button below:*

[Click here for the questionnaire](#)

Please note: Deadline August 31, 2022

Although your participation is entirely voluntary, your input is the most valuable information to develop the upcoming deliverables in the next generation of dynamic energy certificates for buildings. Thank you very much for your contribution. We will be glad to introduce your know-how and input to the new deliverable.

Under the [General Data Protection Regulation](#) (GDPR) (EU) 2016/679, it is our legal duty to protect any information collected from you. This data will be held in compliance with Article 14 of the GDPR. Any responses to the survey and any attachments may be privileged and/or confidential and intended for the exclusive use of the research purposes. Only cumulative results will be published (not personalized answers). As outlined in the privacy information notice, the data you provide will be kept until 12 months after the project ends.

You are provided with certain rights that you may have the right to exercise through this survey. In summary those rights are:

1. To access, correct or erase your data;
2. To object to the processing of your data;
3. To request that our processing of your data is restricted;
4. To request that your data be transferred;
5. To withdraw your consent for us to process your data.

The record of your survey responses does not contain any identifying information about you unless a specific survey question explicitly asked for it. If you used an identifying token to access this survey, please rest assured that this token will not be stored together with your responses. It is managed in a separate database and will only be updated to indicate whether you did (or did not) complete this survey. There is no way of matching identification tokens with survey responses.

This project has received funding from the European Union's Horizon 2020 research and innovation program under grant agreement No. 892984.
